DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- Group I, claim(s) 1-9, drawn to a tangential filtration membrane.
- Group II, claim(s) 10-17, drawn to method for fabricating a membrane.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

All of the claimed inventions share the same special technical feature of a membrane with a porous support, a flow channel, an inlet and outlet, a separator layer, and having a permeate pass through the porous support, however, this feature does not offer contribution over the prior art. Pirbazari et al. (USP 5,505,841) discloses a microfiltration membrane (abstract) and in figure 1 comprising a flow channel (106 - crossflow path) with an inlet and an outlet (flow enters at one end, exits at the other as shownn by the flow arrows), a membrane support (labeled "Membrane Support", which is porous), a membrane (labeled "Microfilter Membrane") and having permeate pass through the porous support (108 – permeate leaving the membrane).

3. A telephone call was made to Christopher Brody on 11/12/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
